

Netzsch NM Series Rotor and Stator Replacement Parts

Outstanding Performance and Quick Delivery at a Superior Price

The TitanNZ series of progressing cavity pump parts are designed as drop in replacements for the Netzsch NM series.

TitanNZ parts offer outstanding performance with quick delivery at a superior price with no hidden import fees. Extensive research and testing ensures compatibility

and interchangeability of all replacement parts to meet or exceed the performance and longevity of the original equipment.

TitanNZ parts were engineered using over 30 years of experience in designing, manufacturing and marketing alternative progressing cavity pump replacement parts. Success has been built upon a

solid foundation of high standards, exceptional service, and readily available inventories of replacement parts. Process downtime costs money. Why wait for replacement parts to come from unresponsive suppliers? An extensive network of stocking distributors are located throughout North America to ensure you receive the parts you need, fast.

The TitanNZ Series Offers 1 and 2 Stage Rotors and Stators for the following Netzsch Models:

- NM021-1L • NM053-1L
- NM021-2S • NM053-2S
- NM031-1L • NM063-1L
- NM031-2S • NM063-2S
- NM038-1L • NM076-1L
- NM038-2S • NM076-2S
- NM045-1L • NM090-1L
- NM045-2S • NM090-2S

Design Characteristics

Stator

- 1 stage rotors and stators offered in ½ lobe L geometry designs
- Flow rates up to 200% of S geometry designs, differential pressures to 90 psi/6 bar
- Materials of construction include Nitrile, Natural Rubber, and EPDM
- 2 stage rotors and stators offered in ½ lobe S geometry designs
- Flow rates up to 100% of S geometry designs, differential pressures to 180 psi/12 bar
- Molded in long lengths and cut to exact dimensions for application versatility and cost efficiency

Rotor

- Available in alloy steel and stainless steel
- Conventional designs and long lead configurations to satisfy application requirements

Why Choose TitanNZ Replacement Parts?

- Replacement parts are interchangeable with the Netzsch NM series
- Dedicated application engineers and support staff ensure proper selection
- Priced attractively as an alternative to other manufactures' progressing cavity replacement parts
- Extensive inventory of TitanNZ parts are ready for immediate shipment
